# Steam Connects Us All

The boilers you inspect today are the direct descendants of the machines that built this country.

# Why Steam Still Matters

Steam didn't just power industry...  
it built America.  
Agriculture. Railroads.  
Manufacturing. Infrastructure

**And today... steam is still working.**  
80% of global electricity is  
powered by steam. Petroleum  
refining. Chemical Manufacturing.

# The Role of Inspectors

Most people think of inspection as compliance. A checklist. A requirement.

You are the reason these systems are allowed to run.

# Help Preserve Our History

**Steam Doesn't Get a Second  
Chance in Public Opinion.**

**One mistake could shut  
down hundreds of years of  
American history  
preservation.**

# Back to The 150 Case Story

It was proof  
that something from  
the past could exist in  
the present—  
**safely...** responsibly...  
and publicly.

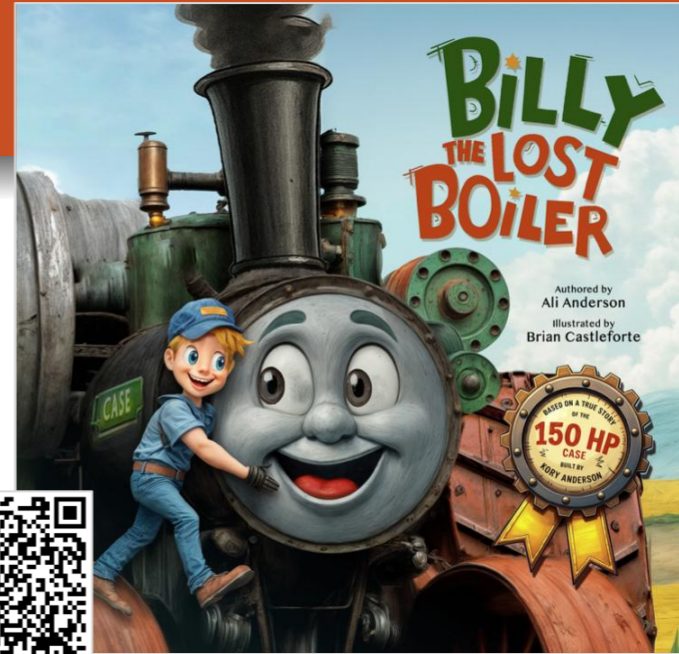

Record-breaking  
50-bottom plow!

# Final Note

Inspect these boilers like it matters... because it does.

Not just for today, but for the **next generations** who will never experience steam... unless we get this right.

# Thank You!

Come take a ride  
this summer!
